

CONCRETE & CONSTRUCTIONAL ENGINEERING

INDEX FOR VOLUME LX, 1965

Analysis by direct inversion of trinomial matrices, Structural	342
" of edge-loaded rectangular slab resting on soil, Ultimate-load	389
" of symmetrically-loaded circular conoidal shells	69, 105, 139, 397

AUTHORS

Acton, J. E., on A computer programme for analysis of effects of torsion	285
Agbim, C. C., on Concrete roads in Nigeria	313
Beaton, N. L., on A precast concrete fire-drill tower	80
Bennett, J. D., on Members subjected to bending and thrust: Rectangular members	213
Bennett, J. D., on Members subjected to bending and thrust: Circular members	445
Burt, C. M., <i>et al.</i> , on A computer programme for design of standard bridge piers	345
Corson, R. H., on A new gauge for measurement of internal strains in concrete	437
Coverman, S. H., <i>et al.</i> , on Data for load-factor design of beams and slabs	251
Csonka, P., on Membrane analysis of parabolic conoids	403
Cusens, A. R., <i>et al.</i> , on A simplified method of analysing free-standing stairs	167
Douglas, A. H., on Structural analysis by direct inversion of trinomial matrices	342
Finstenwalder, U., on Modern designs for prestressed concrete bridges	99
Francis, A. J., on A pioneer of concrete	268
Francis, A. J., on Early concrete buildings in Britain	73
Giles, C. W., on Properties of beams of triangular cross-section	352
Holmes, M., <i>et al.</i> , on Design of continuous concrete slabs supported on steel beams	303
Jackson, N., <i>et al.</i> , on Stresses in wide-flanged T-beams	205
Kaliszky, S., on Economic design by ultimate-load method	365, 424, 461
Klasmer, H., on Restrained ribbed slabs with distribution ribs	53
Kuang, Jing-gwo, <i>et al.</i> , on A simplified method of analysing free-standing stairs	167
Lee, C. R., on Research on concrete structures in nuclear engineering	195
Little, G., on Design of Bow Bridge Intersection	379
Lord, W. D., <i>et al.</i> , on Stresses in wide-flanged T-beams	205
Magnus, D., on Pierced shear-walls	89, 127, 177
Morgan, V. A., on Town Hall extension, Ealing	221
Nawy, E. G., on Cracking of slabs spanning in two directions	373
Nesbit, J. K., <i>et al.</i> , on A code for structural lightweight-aggregate concrete	415
Prabhu, S. S., <i>et al.</i> , on Data for load-factor design of beams and slabs	251
Rawnsley, J. E., on A concrete dam in Yorkshire	411
Sharpe, N. R., <i>et al.</i> , on A code for structural lightweight-aggregate concrete	415
Soretz, S., on Fatigue behaviour of high-yield steel reinforcement	272
Sriskandan, K., <i>et al.</i> , on A computer programme for design of standard bridge piers	345
Steel, K. A., <i>et al.</i> , on Design of continuous concrete slabs supported on steel beams	303
Tokarski, E. W., on The analysis of symmetrically-loaded circular conoidal shells	69, 105, 139, 397
Venecianin, S. D., on The interaction of parallel frames	259, 468
Wilby, C. B., on The metric system	359
Bar bending dimensions, Revised standard for spacers	142, 200
Beams of triangular cross-section, Properties of	352
Bending and thrust, Members subjected to	213, 445
Bond of reinforcement coated with bentonite slurry	121
BOOK REVIEWS
